

This Spring at Holy Trinity School

Programming from "Scratch" (Grades 2-5)

Wednesdays, 3:15 - 4:45 pm, 6 week session beginning March 9th
*** no class March 23rd for Spring Break, last class April 20th**

Scratch is a kid-friendly, open-source, popular language developed by MIT's Media Lab. Students learn the basics of computer game design and how key scientific concepts can be learned and practiced by playing an indie game. As students add more challenges to their games they build reasoning, design and problem-solving skills. No previous experience required.

Instructor: Vibha Nayyar

LEGO Robotics (Grades 6-8)

Mondays, 3:15 - 4:45 pm, 6 week session beginning March 7th * no class March 21st* last class April 18

Learn to build and program LEGO EV3 robots that play music, make drawings, sort objects, or guard the yard like a dog, using sensors, motors, and logic programmed in Scratch.

Instructor: Paul Hanau
